Additional comments (or what we found especially interesting):

- The Ministry of Finance finished financing of gross borrowing needs for 2026.
- ASWs saw a sizeable increase across the curve with a particularly strong increase in the short-end (the effect of a sharp rise in bond yields without a corresponding move in swap rates).
- September brought a solid (almost) PLN 10 billion increase of foreigners' holdings in the POLGB market, the second highest increase this year.
