Ailevate is a first-generation AI automation company helping businesses cut costs, uncover lost revenue, accelerate operations, and unlock new growth. Our domain-specific AI agents integrate seamlessly into existing systems—automating the manual, time-consuming tasks that hold businesses back.

Founded by experts in AI, data analytics, cybersecurity, and enterprise infrastructure, Ailevate delivers scalable automation without disrupting your workflows. Our pre-trained AI agents are built for privacy, speed, and results—empowering business and IT leaders to boost performance and protect margins at the same time.

Introduction

We saw a pattern: too many teams were buying “AI-powered” tools that still needed armies of people, workarounds, and cloud dependencies.

So we built Ailevate—a platform where autonomous agents can plug into any environment, operate without human oversight, and solve complex problems in real time.

It started with one application. Now, it's an entire system.

Revenue Recovery enables healthcare providers to recover revenue lost to preventable claim denials.

Built on an innovative AI platform, **Revenue Recovery** automates coding related denial management so you can resubmit claims and get paid faster.

Revenue Recovery is an AI-powered solution that automatically identifies, corrects, and resubmits denied healthcare claims caused by coding errors and common formatting errors.

Core Principles

VISION

Our vision is to eliminate inefficiency at scale – replacing manual processes with AI that works 24/7, fits your systems, and drives results.

MISSION

Our mission is to free businesses from operational drag – with an AI workforce that scales effortlessly, integrates instantly, and unlocks real growth.

STRATEGY

Deploys background AI workforce that reduces human workload without disrupting existing workflows.

- Solves real business pain points: slow processes, high operational costs, and data security risks.
- Integrates seamlessly into existing ecosystems with a fast, low-friction deployment.
- Delivers measurable ROI by automating inefficiencies while improving speed, accuracy, and scalability

OBJECTIVES

Eliminate bottlenecks caused by outdated, manual processes.

- Reduce overhead by automating time-consuming, low-value tasks.
- Lower barrier to AI adoption by providing a no-code solution.
- Increase accuracy and reliability by replacing error-prone manual tasks with automation.

Leadership Team

– Innovative and Results Driven

Kevin Lavin
Chief Executive Officer

Kevin is a seasoned expert in strategy and financial management. With more than 25 years advising owners, boards of directors, senior executives, and creditors, he helps organizations navigate financial complexities, optimize performance, and drive sustainable growth.

Glen Pendley
President/Chairmen

Glen is a seasoned technology executive and entrepreneur with over 20 years of experience leading high-growth software companies. He held executive leadership roles at several enterprise technology companies where he oversaw the development and delivery of platform initiatives and global product strategy.

Luc Delsalle
Chief Technology Officer

With a passion for building and scaling high-performing engineering teams, Luc has 15+ years of experience leading cross-functional teams, driving technical excellence, and fostering innovation in fast-paced environments. He excels at transforming complex ideas into market-ready products.

Jeff Hunter
Chief AI Officer

Jeff brings 25+ years of experience in data, analytics and artificial intelligence from Wall Street to Fortune 500 brands to US Intelligence agencies. Jeff's R&D team is building the next generation neuro-agents and applying key cognitive attributes to agentic frameworks.

James Rafferty
Chief Revenue Officer

James has been in the technology sales space for over 20 years and brings extensive experience in building sales organizations within new and established organizations. Experience developing teams delivering solutions directly to end customer as well as delivering solutions through channel.

Kelsey Jensen
Chief Marketing Officer

With 15+ years as a professional in technology and marketing, her expertise lies in GTM and strategic planning, channel optimization, and fostering impactful partnerships for activation that propel businesses forward.

Logos

The logo system is comprised of a stylized elevator concept a square and up arrow and logotype. The new logo embodies the brand essence of elevation and empowerment while embracing the brand attributes of secure, accessible, easy, ethical, and innovative.

How AI Agents Could Redefine Work, Not Replace Workers

Silicon Valley has a new favorite buzzword: agentic AI. The term refers to AI “agents” that can make decisions and take actions autonomously, rather than just respond to prompts. These AI agents are being hailed by many as the next big step in automation, poised to handle complex multi-step tasks on their own..
