

About MoviTHERM

Advanced Thermography solutions was founded in 1999. The company has 100% focus on infrared imaging for scientific and industrial applications. MoviTHERM sells thermal imaging cameras, enclosures and accessories as part of their distribution model, but also offer off-the-shelf, turnkey thermal imaging solutions for condition monitoring, automated thermal imaging as well as non-destructive testing. Services include custom system design and software development, consulting, camera rentals, feasibility studies and OEM Product Design.

The MoviTHERM Mission

From MoviMED evolved MoviTHERM, an efficient entity specialized in turn-key thermography inspection solutions. We demonstrate the determination to carry out our vision of providing quality outsourced innovative turnkey Non-Destructive Testing, providing advanced applications of thermographic technology.

Markus Tarin

President & CEO of MoviTHERM

Markus Tarin has studied Radio and Television Engineering as well as Embedded System Design in Germany, where he graduated in 1996. He has extensive experience with visible and non-visible imaging, especially in the Near Infrared (NIR), Shortwave Infrared (SWIR), Midwave Infrared (MWIR) and Long Wave Infrared (LWIR). Tarin was the lead architect on many product development projects for defense, research, medical and industrial applications. Through his company he has commercialized many of these developments for remote monitoring, automated thermal imaging and non-destructive testing. MoviTHERM is a FLIR Systems, Inc. Distributor and Integrator.
