

The UK's Dedicated Composites Summit Returns

The International Composites Summit (ICS) will return on 1–2 December 2026 at The Drum at Wembley, London, reinforcing its position as the UK's dedicated platform for business, collaboration, and growth across the global composites industry.

Now entering its next phase, ICS is evolving with a clear ambition: to create a commercially focused environment where connections lead to tangible outcomes. From deal-making and investment opportunities to cross-sector collaboration, the 2026 summit will expand its content, exhibition opportunities, and skills-focused initiatives to better serve an industry under increasing pressure to scale.

A Business-First Platform for Industry Growth

ICS has always been built around a simple principle: bringing the right people together to move the industry forward.

The 2026 edition will strengthen this approach, offering:

- Greater opportunities for structured networking and targeted introductions.
- Increased access to investors and commercial partners.
- Expanded exhibition space to showcase innovation and capability.
- A broader skills and talent focus to support long-term industry development.

This is not about replacing existing industry events. ICS is designed to complement global platforms such as JEC World, CAMX, and Advanced Engineering Show, extending their impact through year-round engagement and initiatives, including ICS Innovation Hubs.

A Global Network, Centred in London

The move to Wembley reflects a strategic decision to increase accessibility and international participation.

London offers:

- Direct global connectivity via major airports.
- Strong national transport links across the UK.
- A high concentration of accommodation within walking distance.

This accessibility is already driving international engagement. ICS continues to attract delegates from across Europe, North America, the Middle East, and Asia, alongside a strong UK presence. Countries represented include Germany, the United States, Saudi Arabia, India, France, South Korea, and many more, reflecting the increasingly global nature of the composites supply chain.

Cross-Sector Relevance, Real Conversations

ICS is deliberately cross-sector, bringing together stakeholders from the aerospace, automotive, energy, construction, defence, and beyond sectors.

From C-suite leaders to engineers, the summit creates an environment where:

- OEMs connect directly with supply chains.
- SMEs gain visibility with global partners.
- Investors access emerging technologies and scalable businesses.
- Researchers and industry align on real-world applications.

Supported by an advisory board and collaborations with organisations including SAMPE and CompositesWorld, ICS ensures its content reflects both technical excellence and commercial relevance.

Sponsorship Opportunities Now Open

With the 2026 campaign now underway, sponsorship opportunities are officially open.

Partners will benefit from:

- Direct access to senior decision-makers across the value chain.
- Visibility within a highly targeted, high-value audience.
- Opportunities to shape content and lead industry conversations.
- Year-round engagement through ICS initiatives and platforms.

More than visibility, ICS offers sponsors the chance to actively contribute to building a stronger, more connected composites industry in the UK and beyond.

Driving Momentum for the Industry

As demand for lightweight, sustainable, and high-performance materials grows, the need for collaboration across sectors has never been greater.

ICS 2026 will provide the environment to make that collaboration happen, not just through discussion, but through action.

--- End ---

About the International Composites Summit (ICS):

The International Composites Summit (ICS) is a global platform for accelerating growth, investment, and innovation in advanced materials. Organised by **Composites Connections**, a platform of **The Fluency Business Group Ltd**, ICS brings together the full composites supply chain, from material innovators and start-ups to OEMs, Tier 1s, and investors.

With its UK-based flagship event and international Innovation Hubs, ICS is designed to create commercial impact, foster strategic connections, and support companies in scaling their technologies and global reach. Focused on high-value networking, investor engagement, and applied innovation, ICS is where the future of composites takes shape.
