For Immediate Release

## Where The Full Composites Value Chain Meets

The composites industry is complex, global, and deeply interconnected. Yet too often, it operates in segments. Materials, manufacturing, OEMs, investors, and emerging technologies all play critical roles, but rarely come together in a single, commercially focused environment.

The International Composites Summit (ICS) is designed to change that.

### **A Business-First, Globally Connected Platform**

Taking place on 1–2 December 2026 at The Drum, Wembley, ICS brings together stakeholders from across the full value chain, creating a space where business, investment, and innovation intersect.

The summit is built around a clear principle: *connection drives progress*.

By combining a business-first approach with global accessibility, ICS creates opportunities for:

- Materials suppliers to engage directly with OEMs.
- Manufacturers to explore new applications across sectors.
- Investors to identify scalable technologies and opportunities.
- Start-ups to connect with partners and funding pathways.
- Academic institutions to align research with commercial need.

### **Creating Density Where It Matters**

What sets ICS apart is not just who attends, but how they connect.

Rather than operating in silos, the summit creates density across the value chain, enabling:

- Cross-sector collaboration between aerospace, automotive, energy, and construction.
- Direct engagement between innovation and application.
- Conversations that move beyond theory into commercial reality.

This environment is increasingly important as the industry seeks to scale technologies, address sustainability challenges, and respond to evolving global demand.

### **Growing Interest from Across the Ecosystem**

ICS is seeing growing engagement from organisations across the composites landscape, alongside increasing interest from investors looking to better understand the opportunities within the sector.

25/05/2026

For Immediate Release

This reflects a broader shift within the industry, as businesses recognise the need for stronger alignment between innovation, investment, and application.

### **Strengthening The Industry Through Connection**

ICS does not aim to replace global trade shows. Instead, it complements them by creating a focused environment where connections can deepen, and opportunities can be explored.

As the industry continues to evolve, platforms that bring the full value chain together will play an increasingly important role.

ICS 2026 is positioning itself at the centre of that conversation.

--- End ---

### **About the International Composites Summit (ICS):**

The International Composites Summit (ICS) is a global platform for accelerating growth, investment, and innovation in advanced materials. Organised by **Composites Connections**, a platform of **The Fluency Business Group Ltd**, ICS brings together the full composites supply chain, from material innovators and start-ups to OEMs, Tier 1s, and investors.

With its UK-based flagship event and international Innovation Hubs, ICS is designed to create commercial impact, foster strategic connections, and support companies in scaling their technologies and global reach. Focused on high-value networking, investor engagement, and applied innovation, ICS is where the future of composites takes shape.
